Election/Restrictions

Amendment Entry

1. The Amendment of October 7, 2003 has been entered. Claims 1-35 have been cancelled. The amendment of October 7, 2003 refers to claims 35-50, however the numbering of the claims is incorrect. Thus, the claims have been re-numbered as 36-51 pursuant to the 1.129. Claims 36-51 have been entered.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 36-49 are drawn to a process for evaluation of biological ligand binding and/or internalization using non-radioisotopic immunologically recognizable hapten-conjugated (labeled) ligands, classified in class 435, subclass 7.93.
 - II. Claims 50-51 are drawn to a product, classified in class 436, subclass 808.

2. The inventions are distinct, each from the other because of the following reasons: Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). The process of group I can be used to acquire conjugated ligands; thereby creating a materially different product. In the instant case the product

Art Unit: 1645

could be used to quantitate the amount of bound ligand; or the product used be used to analysis the competitive binding effects between ligands. Therefore the product could be used with a materially different process. Therefore, the methods of the inventions are distinct as claimed.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1645

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
